

# CHYRONHEGO®

## Comprehensive solution from Intinor for contribution of football in the Finnish league

ChyronHego is a global leader in supplying graphics, playout and visualization of real time-data for the broadcast industry. During 2014 ChyronHego Fi got the mission to deliver broadcast equipment to the highest division of the Finnish football league and choose a comprehensive solution from Intinor. With Direkt links installed in ten football arenas around Finland

contribution of HD productions to Helsinki are made easy. There Intinor Direkt routers are ready to receive, re-distribute and play out live content on SDI. All units are connected, IP streams managed and everything remote controlled via ISS - Intinor system for stream statistics, management and surveillance.

With Intinor Direkt router its easy to re-distribute clean feeds of HD content to external receivers and simultaneously play out each IP stream on SDI for further processing in ChyronHego's own developed system for graphics and commentary. With the optional RTMP sends also directly to web-TV.

*“Intinor deliver a perfect solution which makes it easy and cost effective to deliver football to the viewers”*

-Timo Lapinaja, Managing Director, ChyronHego Fi
